

This school takes special care for personality development of our students. During the assembly we invite students to deliver speeches on selected topics related with social, national, humanitarian, economic and other issues. Keeping in view the standard (class) of students topics are allotted to them.

We keep record of every students about his pronunciation, subject, body language etc. during time for other activities we guide the students about their mistakes and suggest them how to improve it.

This activity has increased the preparedness level of students. They always come with there realistic and original thinking. Sometimes they narrate such examples of their villages or family incidence which really reflects their capacity to think in depth.

This activity has also given a positive turn to most of the students who listen to the ideas of other. It has enhanced the self discipline of our students. It has encouraged them to participate in plantation as well as in cleanliness activities.

We do get positive feed back from the villages of the students where some of them guide their neighbors about how to keep safe from malaria and to take help of health workers and hospitals as soon as any problem arises.

So we are now considering to innovate and ask at least one of our teachers to express his view on the selected topic in future.
